

# 第 28\_1 项训练：矩阵运笔

The image shows a 5x5 dot grid divided into two horizontal sections. The top section contains two paths: a green path and a red path. The green path starts at the second dot from the left in the second row, moves down to the third row, right to the third column, up to the second row, down to the fourth row, and right to the fourth column. The red path starts at the first dot in the first row, moves down to the second row, right to the second column, down to the third row, right to the third column, up to the second row, right to the fourth column, down to the third row, and up to the first column of the fourth row.
